

Introducing and imagining of ourself

My observation with
explain about me

Chapter 1

What is the different between introduce and imagine of ourself.

People is the ocean of problems, thoughts, temperaments and personal brands. Everyone differently understand what is introduce and imagine when describing your problems, thoughts, temperament.

In schools teaching our, primary you should say, let me introduce by myself. But nobody didn't say that its your first step to create your personal brand to new people at first meet.

The most people after this phrase being to telling some common information about himself and how they imagine himself. From my opinion, at first you should say about your strong individual characteristics and job skills with some description. For example about me, Im observant person, because I usually observe many hidden details about people, processes, and I have strong project management skills because during seven years I was head manager of many projects.

The man at ocean of thoughts about himself. This is man with good personal brand because ocean is awesome.

Roughly speaking, personal brand is the list of concrete skills, characteristics which you can introduce to form a picture of yourself. If you tell some untruth about yourself at first, meeting your personal brand will can destroy during some times because people will know the truth about you. The personal brand is a very sensitive thing, it's easy to lose but very hard to earn.

In the end I want to say, you can imagine yourself how you want, but your personal brand should be built by introducing your skills and personal characteristics.

Chapter 2

Tips and explain

How do I introduce myself.

Tip. At primary you should tell some common information about you.

Hello to everyone who read this introducing. My name is Yuriy Pogrebnyak. Im from Kyiv. Im study at nano-physics, nano-electronics nano-department, at nano-faculty at Taras Shevchenko National University of Kyiv.
